

EDOARDO CIARROCCI

Backend Developer — Java & Cloud Specialist

San Benedetto del Tronto (AP), Italy | +39 349 0687826 | edoardo.ciarrocchi@outlook.it

GitHub: github.com/Endless8 **LinkedIn:** linkedin.com/in/edoardo-ciarrocchi-3660b192

PROFILE

Software Engineer with 7 years of experience in backend development using Java and Kotlin, specialized in microservices architectures on cloud platforms (AWS, Azure). Experienced with event-driven systems (Apache Kafka, Azure Service Bus), containerization and orchestration (Docker, Kubernetes, ArgoCD), and re-engineering and data migration projects for public sector entities and private companies. Contributed to functional and architectural decisions within development teams, with a strong interest in growing into roles of greater technical responsibility.

SKILLS

Languages: Java (Spring Boot, Quarkus), Kotlin, C#, JavaScript

Databases & Storage: PostgreSQL, OracleDB, Microsoft SQL Server, MongoDB, Redis, Amazon RDS, S3, Flyway

Architecture & Frameworks: Microservices, REST API, GraphQL, Spring Boot, Quarkus, Event-Driven Architecture

Cloud & DevOps: AWS (EC2, RDS, S3, Lambda), Azure (Service Bus), Google Cloud Platform, Docker, Kubernetes, ArgoCD, Jenkins, GitHub Actions, GitLab CI

Messaging: Apache Kafka, Azure Service Bus

Testing: JUnit, Mockito, Selenium, Gherkin, Load Testing

Tools & Collaboration: Git, Jira, Confluence

Languages spoken: Italian (Native), English (B2 — Upper Intermediate)

WORK EXPERIENCE

Software Developer

TeamSystem | Dec 2025 – Present

- Development, maintenance and deployment (CI/CD via GitLab and ArgoCD/Kubernetes) of Java/Kotlin microservices with Spring Boot in the IAM domain, both greenfield and on existing systems
- Integration of services with Apache Kafka and Azure Service Bus for event-driven communication, cache management with Redis and database migrations with Flyway on PostgreSQL
- Load testing of existing applications to identify performance bottlenecks
- Authoring technical documentation on development processes, within a team of 12 people

Back End Developer Senior

IBM | May 2024 – Nov 2025

- Co-responsible, together with a colleague and under the supervision of the architect, for functional and architectural decisions on the backend of the MIMIT project (Java/Quarkus on AWS)
- Adapted application logic and data models following the database migration from relational to NoSQL, handling mismatches between the two paradigms
- Developed serverless functions (AWS Lambda) for asynchronous generation of thumbnails from images uploaded by users

Developer Senior

Softlab | Jun 2023 – Dec 2023

- Design and development of Java/Spring Boot microservices for the Transplant Information System of the Italian Ministry of Health
- Implementation of CI/CD pipelines to optimize the deployment process

Backend Developer

Supernova Hub | May 2022 – Mar 2023

- Developed solutions on a C#/.NET stack for a warehouse management and order tracking system
- Supported the implementation of both backend and frontend features

Software Development Engineer in Test*Relatech | Nov 2021 – May 2022*

- Created and automated test suites in Java for pharmaceutical retail applications, working alongside the development team to improve software quality

Software Consultant*Gruppo SI | Nov 2019 – Nov 2021*

- Developed and maintained SOAP and REST web services in Java and ObjectScript for healthcare projects, including requirements analysis and support in defining custom solutions

EDUCATION

Web Developer Course*Gruppo SI | Jun 2019 – Oct 2019*

- Intensive course on Java, Spring Boot, Databases and Algorithms, focused on building enterprise applications

Master's Degree in Architecture*Eduardo Vittoria | Oct 2009 – Apr 2013*
